

## RING SIZE GUIDE

### MEASURE AN EXISTING RING

To get the best results, you will need to go to the 'printing settings' before printing and ensure that the 'page scaling' option is set to 'none' in the print dialogue box. Our Ring Size Chart must be printed on a full A4 size page.

To check that the Ring Size Chart has been printed properly, take a ruler and measure the sample below. It should measure exactly 2 cm.

### USING RING SIZE CHART

- If you have a ring that perfectly fits the finger on which the our creation will be worn, you can place it over the nearest sized circle of the Ring Size Chart.
- If your ring appears to be between two sizes, we recommends that the larger size be chosen.

The inner edge of the ring is not aligned with the outer edge of the circle

SELECT  
A SMALLER SIZE

The inner edge of the ring is not aligned with the outer edge of the circle

SELECT  
A LARGER SIZE

The inner edge of the ring is aligned with the outer edge of the circle

THIS IS  
PERFECT SIZE

## RING SIZE GUIDE

### MEASURE YOUR FINGER

---

If you don't have any rings or want to know your size, you can measure your finger is using these steps:

1. Take a piece of string or a strip of paper
2. Wrap it around the finger you'd like to wear the ring on, do make sure it is a snug fit
3. Mark where the ends meet with a pen, unwrap it and measure against a ruler (mm)
4. Taking the measurement, use the charts to see what your ring size is.

### SIZE GUIDE

---

Just to make you aware that there are different measurement tables across the world. In the UK we list our products with alphabet sizes as opposed to numbers.

Find your size using the tips above and with the International sizes table below.

We can also make any UK ring size for you: from the smallest, A, to the largest, Z, so you really can find the perfect fit with us.

### EXPERT TIPS

---

- The average ring size for women is size N½ (for UK and Australia), size 7 (for US and Canada)
- The average ring size for men is size T½ (for UK and Australia), size 10 (for US and Canada)
- When measuring to determine ring size, ensure that you are measuring the exact finger (and hand) where the ring will be worn.
- Measure your finger at the end of the day as that is when they are at their largest.
- DON'T measure your fingers when cold as they tend to be a half size smaller when cold.
- Rings with wider bands will fit a bit tighter. If you plan to measure one of her rings, try to measure one with a similar width as the ring you want to purchase.
- When determining the ring size from an existing ring, ensure that the ring you choose to measure is worn on the exact finger as the new ring.
- A ring should fit secure enough so that it will never fall off. It should have a loose comfortable fit when sliding it over your knuckle.

## INTERNATIONAL RING SIZE GUIDE
